

# Customer Rate Information Schedule GPC

## Gas Procurement Core

### Applicability:

Applicable to core customers who elect to purchase natural gas from the Utility, including the benefits derived from utility managed storage service. Pursuant to D.02-08-065, this schedule is not available to electric generation, refinery, and enhanced oil recovery customers whose gas consumption exceeds 250,000 therms during the most recent 12-month period. For customers with less than 12 months of historical data, the usage level shall be determined on a pro rata basis using the months for which usage is available.

**Cost of Gas:** The GPC core cost of gas reflects the utility's forecast weighted average cost of gas (WACOG), including storage withdrawals for the current month, plus any amortizations from the previous months.

**Capacity Charge\* :** The capacity charge reflects the Utility's forecast weighted average cost of transportation (WACOT) for core customers, based on firm interstate reservation charges and brokered capacity costs.

**Storage\*\* :** Carrying Cost of Storage in Inventory Charge

**F.F. & U:** Charges to Utility power plants (i.e. UEG customers) shall be adjusted to remove all franchise fees and uncollectibles.

**Brokerage Fee:** Service under this schedule provides for utility brokerage services associated with gas

**SDG&E Gas Price:** This gas price is embedded in SDG&E's core customer's bundled tariffs; GR, GR-LI, GM, GS, GT, GN-3. This is the price that is avoided when core customers purchase their gas from a third-party gas suppliers.

\* A therm equals approximately 100,000 British Thermal Units (Btu) which is approx. 100 cubic feet.
